List of tables, figures and boxes	viii
List of abbreviations	ix
Explanatory notes	xi
Executive summary	xii
CHAPTER 1. KEY ISSUES IN THE DEVELOPMENT OF AGRICULTURE IN AFRICA	1
1.1 Challenges in african agriculture	2
1.2 Role of technology and innovation	2
1.2.1 Renewed drive for investment	4
1.3 Key issues	5
1.3.1 The global financial crisis	5
1.3.2 Land tenure and credit access	5
1.3.3 The food crisis	5
1.3.4 Focusing on smallholder farmers	6
1.3.5 Adapting to man-made change	8
1.3.6 Bioenergy and sustainability in agriculture	8
1.3.7 Structural policy reforms	8
1.3.8 Liberalization, agricultural trade and global markets	9
1.4 Developing and disseminating relevant technology	9
1.5 The imperative of demand-led approaches to agricultural development	10
1.6 Rethinking african agriculture from an innovation perspective	11
1.7 Agriculture and economic transformation of Africa	12
1.8 Signs of success	13
CHAPTER 2. BUILDING INNOVATION CAPABILITIES IN AFRICAN AGRICULTURE	15
2.1 Introduction	16
2.2 Innovation systems as a policy tool	16
2.2.1 Characterizing an Agricultural Innovation System	17
2.2.2 Mapping key actors and linkages	18
2.3 Innovation as an interactive process	18
2.3.1 Linkages between scientists and practitioners, including farmers	20
2.3.2 Horizontal linkages between farmers and extension services	20
2.3.3 Linkages between the farming and non-farming systems	21
2.4 Linkages between farmers, global networks and value chains	21
2.4.1 Banana value chain: the case of East Africa	22
2.4.2 Cassava value chain: the case of Zambia	22
2.4.3 Other examples	23
2.5 Creating an enabling environment for agricultural innovation	23
2.5.1 What is an enabling environment?	24

CHAPTER 2. (continued)

2.5.2 Strengthening the enabling environment through appropriate policies	2
2.5.3 Policies for physical infrastructure and extension services.....	2
2.5.4 Policies that promote the complementary roles of private and public investment	2
2.5.4.1 Financing smallholder farmers	2
2.5.4.2 New financial instruments and barriers to private investment	2
2.5.5 Policies that promote linkages between local farmers and other actors in the AIS.....	2
2.5.5.1 Improve existing markets and services	2
2.5.5.2 Create new organisations for collaborative learning.....	2
2.5.5.3 Linking R&D to Firms and Farms.....	2
2.5.5.4 Facilitating access to inputs through smart subsidies and credit	2
2.5.5.5 Building partnerships between small- and large-scale farmers	3
2.6 The role of intellectual property rights in small-scale farming	3
2.6.1 Open innovation and other alternate approaches.....	3
2.8 Summary.....	3
CHAPTER 3 AGRICULTURE AND NATIONAL FOOD SECURITY.....	3
3.1 The determinants of national food security	3
3.2 Sources of food supply.....	3
3.2.1 Africa's food sources.....	3
3.2.2 Food stocks and imports.....	3
3.3 New determinants of food security	3
3.3.1 Soil degradation and climate change	3
3.3.2 Biofuels and food security.....	4
3.3.3 Feeding livestock	4
3.3.4 Migration and rural development.....	4
3.4 The role of agricultural trade in food security	4
3.4.1 Africa's agricultural trade deficit and policy linkages.....	4
3.4.2 Trade and agriculture policy linkages.....	4
3.4.3 Trade policy in the wake of the food crisis	4
3.5 Summary.....	4
CHAPTER 4 CHALLENGES AND OPPORTUNITIES TO ACHIEVE FOOD SECURITY.....	4
4.1 Agriculture and development: regional comparisons.....	4
4.1.1 Growing food demand and shrinking supply of arable land	4
4.1.2 The impacts of climate change on agriculture.....	4
4.1.3 Tenancy rights and access to credit.....	4
4.1.4 The role of public institutions.....	4
4.1.5 The investment gap in agriculture	4
4.1.6 Development assistance.....	5
4.1.7 Emergency aid	5
4.1.8 Following through on pledges.....	5
4.2 The green revolution: a brief regional comparison.....	5
4.2.1 Yield versus harvested land.....	5
4.2.2 Regional differences and unequal productivity	5
4.2.3 Lessons from the Green Revolution and relevance to Africa.....	5
4.3 Towards a rainbow revolution in Africa.....	5
4.3.1 The Case of India: approach to a second Green Revolution	5
4.3.2 The Case of Brazil: from a technology taker to technology exporter.....	5

4.4 Implementing a uniquely African green revolution	61
4.5 Summary.....	62
CHAPTER 5 TRANSFER AND DIFFUSION OF AGRICULTURAL TECHNOLOGY.....	65
5.1 Introduction	66
5.1.1 <i>The evolution of approaches to agricultural research</i>	67
5.2 Transfer of technology	67
5.3 Technology adoption.....	69
5.3.1 <i>Enabling environment for technology adoption</i>	69
5.4 International cooperation: emerging modalities in agriculture technology transfer.....	70
5.4.1 <i>South-South cooperation</i>	70
5.4.2 <i>Africa's cooperation with China and Brazil</i>	71
5.4.3 <i>Triangular cooperation</i>	71
5.4.3.1 <i>Japan and triangular cooperation</i>	71
5.4.3.2 <i>Multilateral organizations and triangular cooperation</i>	72
5.5 Summary.....	72
CHAPTER 6 TECHNOLOGY MIXES FOR SMALL-SCALE FARMING.....	73
6.1 Introduction	74
6.2 Mechanical technology	74
6.3 Irrigation systems.....	75
6.3.1 <i>Irrigation technologies and management systems</i>	75
6.3.2 <i>Predicting when to irrigate</i>	76
6.3.3 <i>Available technological solutions</i>	77
6.4 Biological technology	77
6.4.1 <i>New Rice for Africa</i>	77
6.4.2 <i>Developing disease-resistant crops</i>	78
6.5 Fertilizers, pesticides and tillage technologies	78
6.5.1 <i>Zero tillage</i>	80
6.5.2 <i>Beneficial biological organisms</i>	80
6.6 Biotechnology	80
6.6.1 <i>Tissue culture and micropropagation</i>	80
6.6.2 <i>The potential of GM crops and their adoption</i>	81
6.7 Combating crop diseases.....	82
6.7.1 <i>Herbicides and pesticides</i>	82
6.8 Post-harvest technologies	83
6.8.1 <i>Reducing post-harvest losses and enhancing shelf life</i>	83
6.8.2 <i>Adding value for perishable products</i>	83
6.8.3 <i>Post-harvest technologies</i>	84
6.8.4 <i>Development and dissemination of post-harvest technologies</i>	84
6.8.5 <i>Methodologies to choose technologies</i>	84
6.9 Summary.....	87
CHAPTER 7 recommendations.....	89
